

How to use Rev. White's personal reading notes in your reading plan.

Hello Bible Readers,

**As a benefit of/for the class,** I have posted the notes Pastor White wrote when he took the class.

As my student, unlike you, I required Pastor White to submit his personal notes. These are his personal thoughts as he was reading. They look different from your daily note taking because Pastor White read an entire book in 1 sitting and then wrote notes from a total book perspective. Since they are his personal reading notes, they are not formatted in a Bible Study type format. Just like you, it is what he got from the text at that particular reading session. The notes take different formats based on what Pastor White was focused on at the time he was reading.

I typed them up and posted them as a resource for you.

**How you can use the notes and class videos.**

After you have completed your reading of a Bible book, read the notes and view the video. Compare your notes with Pastor White's notes and the class video to see if you saw similar things and/or find answers to some of your questions about the Bible book you just completed.
